

## Limerick Centre May Newsletter

Hello everyone,

### Cherry Blossoms

The theme this May has been Zoo animals & Summer, we have spent a lot of time outside in the sun learning how to take care of our bodies in the heat by wearing hats and putting on our sun cream. We learnt about the changes in weather when summer comes around and used the sun in our art activities.

When we were learning about zoo animals, we did this through conversations, art and sensory activities. We learnt about animals skin colors and patterns with craft paper, and we rescued some animals stuck in ice!

## Heathers

For our **Heather class** this month we were learning all about the zoo by using a zoo animal matching activities and singing songs like "let's go to the zoo"! We learned all about pets: the different types, their homes and what foods they eat. We looked at the different types of weather and used play doh mats to recreate the weather. We also looked at bugs and insects and matched coloured caterpillars to the correct leaves and butterflies to the correct coloured flowers. We were lucky this month with the weather and were lucky enough to enjoy a few morning circle times in the sunny weather!

Thank you!
